# Advice to Customers

## PLEASE READ BEFORE MAKING OUT ORDERS

**All Quotations** are f. o. b. Webster, Texas; Semmes, Alabama, and Big Point, Mississippi, and are subject to change without notice.

**Terms, Cash** with order, if for immediate shipment. On orders booked in advance of the shipping season 25 per cent down, with the balance due when the shipping season opens.

**Remittances** may be made by P. O. Money Order, Express Money Order, Bank Draft, or Registered Letter. Cash sent through the mail is at sender's risk. Make all remittances payable to **Saibara Nurseries**.

**Orders Booked** will be held subject to purchaser's order until February 1, 1915. Should they not be taken up by that time, or no special arrangement be made for holding further than the date named, they will be considered canceled, and the amount paid will be forfeited.

**Applying Prices.** Five, fifty and five hundred trees of one class at ten, hundred and thousand rates, respectively, purchaser's selection from varieties of one fruit having a common price. For instance, fifty or more oranges, in one or more varieties, would come at the hundred rate, and five hundred or more at the thousand rate. The foregoing does not apply to badly assorted orders, or to long lists made up of a few each of many varieties.

**Shipping Directions.** Give plain and explicit directions for shipping. When none are given, we shall use our judgment in the matter, but in all cases shipments are at purchaser's expense.

**Shipping Season** is from November to April for all trees and plants. Citrus trees can, however, be shipped at any season of the year, but summer shipments must be by express.

**No Charge for Packing.** Our packing is done in the most careful manner, without any regard to the cost, for which no charge is made.

**Shipping by Mail.** In ordering trees or plants for shipment by mail, add 15 per cent to the list price on the smallest size given, to cover cost of postage. We cannot guarantee trees to come up to size specified, as only small specimens can be sent this way.

**We Guarantee** all stock sent out to be well rooted, well grown, true to name, properly packed, and shipped according to instructions. Our liability under the foregoing guaranty is limited in amount to the original price received.

**Substitution.** When out of varieties ordered, we will substitute others, unless otherwise instructed.

**Our Liability.** We shall exercise every reasonable care and precaution in taking care of the stock purchased or booked for future delivery by any of our customers, and shall endeavor to deliver it in the best condition when wanted. But our liability shall not extend further than this, and it is expressly stipulated that we are not to be held liable for loss by any act of Providence beyond our control.

**Claims.** If, by any possibility, errors should occur, they will be promptly rectified, if claim is made within ten days after the receipt of the goods.

**References.** The Houston National Exchange Bank, Houston, Texas; The People's Bank, Mobile, Alabama; Webster State Bank, Webster, Texas; Bradstreet and Dun Mercantile Agencies.

**CONTRACT FOR PLANTING.** We contract to plant and take care of large orchards anywhere in the Coast country, under the supervision of our expert Japanese horticulturists, giving them the same scientific care and attention that we give to our own orchards. We also design and plant public and private grounds of all kinds.

**HORTICULTURAL QUESTIONS AND ADVICE.** We are pleased to answer inquiries from our customers concerning the selection of the soils, what to plant, how to plant, when to plant, etc. Our horticulturist will visit plantings personally to inspect the character of the soils, treatment of diseases, etc., for those who request us to have it done.

Satsuma Oranges

## Citrus Fruits

All our Citrus trees are on *Citrus trifoliata* roots, which were transplanted before the budding.

**CULTURE.**—Well-drained, sandy loam, underlaid by clay sub-soil, is an ideal Orange soil. The ground should be pulverized thoroughly by plow, disc and harrow, before planting. Stake the ground as straight as possible. Round Orange trees should be set about 20 feet apart: 14 to 20 feet apart is sufficient for Satsuma Orange trees. Plant only healthy, vigorous, young trees, purchased from a reliable establishment.

Dig holes just previous to planting, large and deep enough to accommodate the roots in their natural position. **Do not plant Orange trees any deeper than they stood in nursery rows.** Pack the soil hard with the feet, and water. The after care of Orange trees does not differ materially from that given other kinds of fruit trees. No pruning is necessary after the trees are planted except at the time of transplanting.

Unless we are instructed to the contrary, we prune our Citrus trees before shipment, ready for planting.

A handsome pamphlet, "Satsuma Orange Culture," published by us, will be mailed to our customers on request.

All our Citrus-fruit trees, except Kumquats, are graded by the caliper measure taken at about 1 inch above the buds, regardless of the height and age of trees. The approximate top-growth is measured by adding all branches, before pruning. Tops will be cut back 40 to 50 per cent before shipment.

**Prices of our Satsuma Orange trees, budded on *Citrus trifoliata* roots:**

No.	Grade	App. top-growth before pruning	Each	10	100	1,000
1	$\frac{3}{16}$ to $\frac{1}{4}$ in.	1 to $1\frac{1}{2}$ ft...	\$0 30	\$2 70	\$25 00	\$220 00
2	$\frac{1}{4}$ to $\frac{5}{16}$ in.	$1\frac{1}{2}$ to 2 ft....	40	3 50	30 00	250 00
3	$\frac{5}{16}$ to $\frac{3}{8}$ in.	2 to 3 ft....	45	4 00	35 00	300 00
4	$\frac{3}{8}$ to $\frac{1}{2}$ in.	3 to 4 ft....	50	4 50	40 00	350 00

2 years old.....	65	5 50	45 00

## Nut Trees

### PECANS

No other fruit or nut tree is growing in popularity so fast as are Pecans in the southern states. It is considered by some people that Pecan trees do well only on low, wet ground; but the truth is they attain their perfection on well-drained, sandy loam, underlaid with clay, with good moisture.

Pecan trees should not be planted closer than 40 feet apart, and 50 to 60 feet is the right distance on rich soil. Since no profit from Pecan trees can be expected the first six or seven years after planting, and it will be ten to fifteen years before the whole ground is utilized by the trees, we strongly recommend the planting of Satsuma orange trees between them. Satsuma orange trees begin to bear in the third year, and give you enormous profits before ten years. Where the Satsuma orange trees cannot be grown, substitution with peach trees would be profitable.

While the Pecan trees can be transplanted as late as the first of March, if there is good moisture in the ground, they always do much better when planted in December and January. The size of the holes should be much larger than the roots, and where the subsoil is compact, blast the ground with dynamite. We have an instructive pamphlet on "Pecan-Culture" which will be mailed to any of our customers on request.

A great many Pecans of doubtful quality have been introduced lately, but we list only a few of the very best which we consider to be the best commercial varieties.

	Each	10	100
2 to 3 feet.....	\$0 75	\$7 00	\$65 00
3 to 4 feet.....	90	8 50	80 00
